D.O.B: 27/08/1975

Work experience:

1991-1992: I was an employee of the Olau passenger ferries and worked as a DJ, and sound engineer alongside the resident cabaret, onboard the MS Olau Britannia, which sailed from my hometown Vlissingen (Netherlands) to Sheerness, Kent (UK).

1992-1997: I began my employment with Stena Line working full time on board the MS Stena Europe and MS Koningin Beatrix, which sailed alternately from Harwich to Hook Of Holland. My role as DJ, sound engineer and presenter for disco and cabaret entertainment remained as before, but after a few months of working for Stena Line I was happy to take on the shared responsibility as entertainment's manager, on the Stena Europe.

1996: The High Speed Ferry project, (HSS Stena Discovery) began. The HSS Stena Discovery is an audiovisual state of the art craft. It features top of the range 24 screen video walls, rear and front projection, and television monitors around the craft. I was assigned by Stena Line to help design the layout and installation of the audiovisual department on board the HSS Stena Discovery and other similar projects.

1997-2007: The HSS Stena Discovery replaced the conventional ferry, MS Stena Europe on it's crossing from Harwich to Hook Of Holland. I have since been responsible for the presentation of disco's, general announcements, business presentations, and general maintenance of the audio visual installation on board the HSS Stena Discovery, and her sister ships which sail from Holyhead to Dun Laihrey, and Stranraer to Belfast.

Onboard projects I've accomplished:

Multi Media: onboard passenger entertainment system which contains, video on demand, music- and music video on demand, and casino gaming.

Radio Station: local passenger information station broadcasting live from Hook of Holland, this system I also customised to be remotely controlled from the HSS Stena Discovery.

2007: MS Braemar Fred Olsen Cruiselines, working onboard as DJ, presenter and entertainment host. Also responsible for onboard radio station. Duties also included onboard deck games, embark and disembarkation and tour escort.

Further information:

I am of Dutch nationality and lived in the Netherlands until January 2000. From this date until present I've lived in the United Kingdom. My English is of a very high standard. Apart from being fluent in Dutch and English, I also speak German.

I hold a full clean UK driving licence for categories: A, B, BE, C, CE, C1E, D, DE, D1E
